

ABSTRACT OF THE INVENTION

A computerized method and system for automatically determining whether an expectation for a health maintenance item has been satisfied is provided. The system generates an expectation for a health maintenance item for a person and the automatically determines whether the expectation has been satisfied. In another embodiment, a computerized method and system generating satisfiers for an expectation for a health maintenance item is provided. The system obtains one or more unsatisfied expectations for a person. The system also obtains possible satisfiers for each of the one or more unsatisfied expectations and displays the possible satisfiers for each of the one or more unsatisfied expectations.
